

Hydrogen + Fuel Cells NORTH AMERICA at SPI 2017, Las Vegas

SOLARPOWER
INTERNATIONAL

SOLARPOWER International (SPI 2017)
September 10-13, 2017
Mandalay Bay Convention Center
Las Vegas, NV, USA

Berlin, Germany (December 13, 2016)

At SPI 2017 we will organize the first Hydrogen + Fuel Cells (H₂+FC) NORTH AMERICA. After 23 years of experience with Europe's largest trade fair for hydrogen, fuel cells and batteries, it is now the time to move to the USA.

SPI 2017 is North America's biggest solar trade fair, around 700 exhibitors and 20.000 visitors are expected. The Energy Storage International (ESI), the largest energy storage event in North America with more than 115 exhibitors, will be co-located with the SPI 2017 as well.

Hydrogen + Fuel Cell exhibitors profit from several synergy effects between the solar and energy storage industry. The topics of H₂+FC NORTH AMERICA will be hydrogen generation, storage and transportation, fuel cell systems and applications, stationary-, automotive-, mobile fuel cells, special markets, components and supplying technology, fuel cell and battery testing.

H₂+FC NORTH AMERICA is being organized via Deutsche Messe's subsidiary Hannover Fairs USA in cooperation with Tobias Renz FAIR.
