CEATI
INTERNATIONAL

Why Partner with CEATI Events?

The CEATI Program Model provides electrical utilities with a cost-effective vehicle for sharing experiences and addressing issues pertinent to their day-to-day operations, maintenance and planning. In addition to serving as a strong technical resource tool through **18 focus areas across generation, transmission, distribution and utilization**, our participants periodically support the development of industry-open conferences and training workshops. **This is where we invite you to come join us.**

Our industry-open events bring manufacturers, service providers, consultants, and world-renowned technical experts together with some of the key-decision makers in the industry. These events present excellent opportunities for targeted networking and exposure to potential clients, placing you directly in front of the end-users of your company's products and services.

Our Spring 2016 Distribution Conference is organized with the support of **4 of CEATI's interest groups composed exclusively of electrical utility representatives**. Representatives from the Distribution Assets Life Cycle Management (DALCM), Power Quality & Advanced Technologies (PQAT), Smart Grid (SGTF) and Strategic Options for Integrating Emerging Technologies & Distributed Energy (SOIG) groups are supporting the event and helped with its organization:

Opportunities Available

Become an Exhibitor or Sponsor - Options

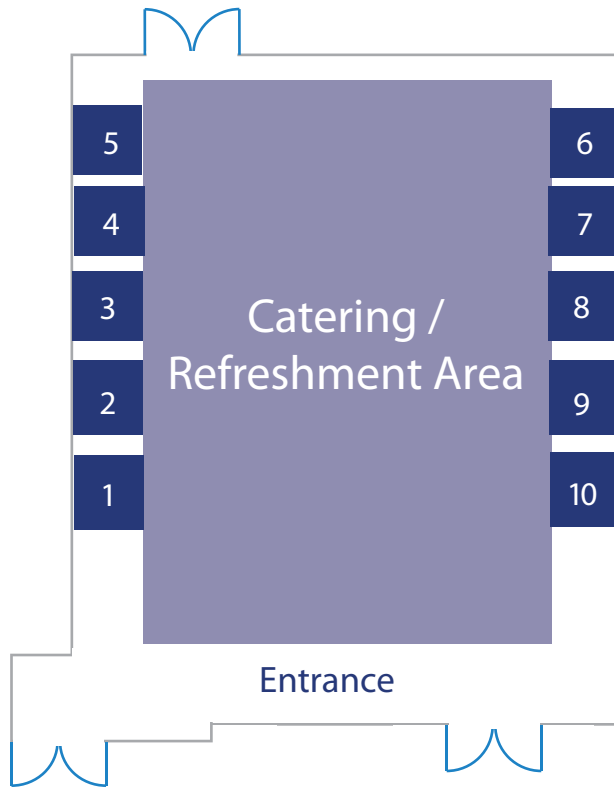

Exhibit and Be Seen
